Callum Drury

Software Developer(Blockchain | Fullstack | AI | Data Science |
React | Node | Solidity | Rust | Python)
Greater Oxford Area

Summary

Blockchain | AI/ML | Web3 | Fullstack Developer | Bot Expert

I'm a highly skilled Blockchain and Full Stack developer with 10+ years of experience, specializing in the development of DeFi applications and full-stack solutions. My expertise lies in creating seamless user experiences by integrating smart contracts, backend, frontend, and bots, particularly for Ethereum and Solana chains.

What I Can Do for You:

DeFi Applications: Proficient in developing token presale, staking, launchpad, DAO, pinksale, pump.fun, DEX, and various other DeFi solutions.

Transaction Analysis: Utilize tools like subgraph and Web3 to analyze past transactions and predict future trends.

Bot Development: Enhance user interaction with custom Telegram and Discord bots.

Technology Stack:

I am adept in a wide array of programming languages and frameworks, including:

Blockchain & Smart Contracts: Solidity, Web3.js, Ethers.js, WAGMI, GraphQL, Rust, Tact, Func, Move.

Full Stack Development: Node.js, Express.js, React.js, Next.js, Typescript, Vue.js, Angular.js, Wordpress, Python, Django, PHP, Codelgniter, Laravel.

Database Management: Mongoose, MySQL, PostgreSQL.

Bot Development: Javascript, Python, python-telegram-bot, telepot, discord.js.

Others: C, C++.

Skills:

- Blockchain Development: Chain Building, Smart Contract Development, Testing, Debugging, and Auditing.
- DeFi Projects: Token Presale, Staking, Launchpad, DAO, Pinksale, Pump.fun Development.
- DEX platforms: Pancakeswap V3, Raydium DEX Forking.
- NFT: Minting, Staking, Marketplace and Game Development.
- Cross-Chain Solutions: Bridges and DEX Platform Forking.
- Security: Blockchain Security and Compliance, Cryptography.

Supported Chains:

Bitcoin, Ethereum, BSC, Polygon, Base, Solana, XRPL, Ton, Tron, Stellar, Sui, Aptos, Cosmos.

Experience

KingIT Solutions

Software Developer

June 2020 - October 2024 (4 years 5 months)

Burnham-On-Crouch, England, United Kingdom

Engineered React interfaces, automated testing pipelines, cross-chain solutions, and Defi platforms, enhancing efficiency, reducing expenses, and driving user growth in blockchain ecosystems.

- Incorporated React hooks to manage the state of data retrieved from a RESTful API across 10+ components, ensuring timely UI updates and enhancing user interaction on mobile platforms.
- Collaborated with the development team to implement testing using Selenium, Appium, and Jenkins within the CI/CD pipeline, increasing test coverage by 75% and reducing production defects by 40%.
- Architected a cryptocurrency trading platform, implementing WebSocket for real-time market data updates, and integrating Web3.js for wallet connections, resulting in a 40% increase in daily trading volume.
- Created an innovative jewelry e-commerce platform using React and Laravel to handle 150,000 items from vendors with 15-minute update intervals, resulting in a 30% increase in conversion rates.

TechSmiths

Software Developer

October 2017 - March 2020 (2 years 6 months)

Liverpool, England, United Kingdom

Leveraged expertise in React, RESTful APIs, and CI/CD to optimize frontend performance, enhance e-commerce SEO, implement testing resulting in significant improvements in API efficiency, website traffic and overall software quality.

- Led collaboration with a team of 5 backend developers to architect and implement a RESTful API optimized for React Native mobile applications, reducing API call latency by 40%.
- Integrated and optimized RESTful API calls using Axios in a React Native environment, improving data retrieval and display efficiency by 50% and reducing load times from 3 seconds to 1.5 seconds on average.
- Redesigned 5 mobile e-commerce applications with a focus on Google SEO best practices for app indexing, resulting in a 60% increase in organic traffic and a 35% boost in conversion rates.
- Architected a robust CI/CD framework utilizing Jenkins and GitLab specifically for React Native projects, automating software builds and quality checks for over 15 applications, leading to a significant decrease in errors and enhanced software reliability.

Crate47

Software Developer

November 2013 - June 2017 (3 years 8 months)

London Area, United Kingdom

Spearheaded full-stack development initiatives using React for the frontend and Node.js for the backend, optimizing API integration, enhancing user interfaces, and improving cross-browser compatibility, resulting in accelerated development cycles.

- Executed the design and launch of 20+ responsive and accessible full-stack applications with Bootstrap and JavaScript; achieved a 30% increase in mobile user engagement, driving overall site traffic and interaction levels.
- Crafted a modular library of 10 React components that adhered to design specifications, providing consistent UI patterns and reducing onboarding time for new developers by 20%, expediting project ramp-up.
- Established and executed a rigorous cross-browser testing protocol across 8 major browsers, ensuring 99.9% consistency and quality across all platforms and reducing post-deployment issues by 60%.
- Implemented Passport.js to handle OAuth authentication for a Node.js backend serving a React frontend, resulting in a 40% reduction in user authentication issues and improving overall security.

TRCREATIVE

Software Developer

March 2011 - October 2013 (2 years 8 months)

Nantwich, England, United Kingdom

- Developed and maintained web applications using a combination of front-end and back-end technologies.
- Collaborated with cross-functional teams to gather requirements and design scalable software solutions.
- Implemented RESTful APIs to facilitate communication between the front-end and back-end systems.
- Engaged in code reviews and contributed to team knowledge sharing sessions to enhance code quality and team productivity.

Education

University of Wales, Bangor

Bachelor of Science (BSc), Computer Science · (2005 - 2010)
